..... Morphing the project into a self-contained executable, downloading the dependencies, and copying the files into the directory where I'll be running the game produced a self-contained executable that did indeed run. Another option would be to set the PATH variable so that all three tools are available and then run the game from inside that directory. Lake Bomans is a small, oval shaped lake. The environment of this lake is a clean, clear water, with an average depth of about 1.5 meters. In many places, the water is transparent, but in some parts, it can be up to 7 meters deep. Located in the west of the area, Lake Bomans is bounded on the north-east by the Aba-Matsagi hills. Lake Bomans is filled with water from three sources. The surface water is from other rivers and streams entering the lake, especially from the Hani River. The middle water is natural water that falls from the hills at the north of the area. The bottom water is from the springs that are located close to the bottom of the hill. The surrounding environment of the lake has clean and clear water. The water in the lake flows from the springs at the north, flows over the flat ground at the east of the lake, and flows to the lake from the Aba-Matsagi hills. The water flow that enters the lake is suitable to fish as it has a clear and clean water. The lake is located in the Mariga Plains District of Nyeri. The area lies between 3-10 km away from the Nyeri town. To the north of the lake lies the Aba-Matsagi hills which has a height of 100-180 metres, covering about 18 km. To the south of the lake lies the Aba-Matsagi plains with a width of approximately 7 km. The lake is surrounded on the east and the west by crop lands, where the ground is flat and is used for crop cultivation. In the middle, there are areas where crops are not cultivated as there is a steep ground that is where 3da54e8ca3
